**Unit #1 - Nature and Shakespeare**

The attentive reader of Shakespeare's poems and plays can hardly fail to notice the remarkable frequency of the Poet's allusions to Birds, not merely as a great choir of songsters, enlivening the woods and fields with their varied music, but as individual creatures, each endowed with its own special characters. Shakespeare has drawn an assemblage of bird-portraits to which, for extent and variety, no equal is to be found in any other great English poet.
