Updating Zoom *to the* **Latest Version**

Zoom regularly provides new versions of the Zoom desktop client and mobile app to release new features and fix bugs. We recommend updating to the latest version when it is available to receive the best video and audio experience. Zoom provides a pop-up notification when there is a new mandatory or optional update.

UPGRADING THE ZOOM DESKTOP CLIENT FOR WINDOWS AND MACOS:

For Windows:

- 1 Sign in to Zoom desktop client.
- 2 Click your profile picture then click Check for Updates. If there is a newer version, Zoom will download and install it.

After

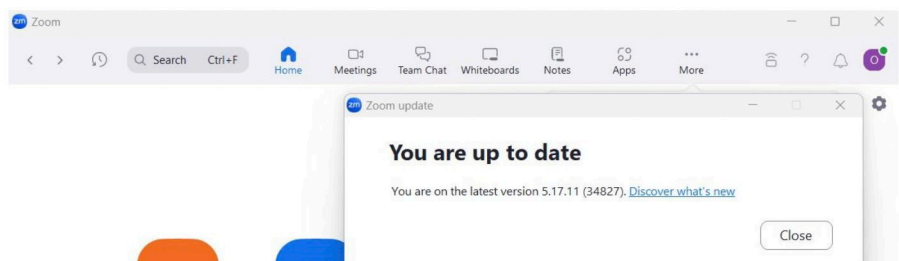

Installing the Zoom update, the application will restart, and you will see the client updated notification upon signing in.

For macOS:

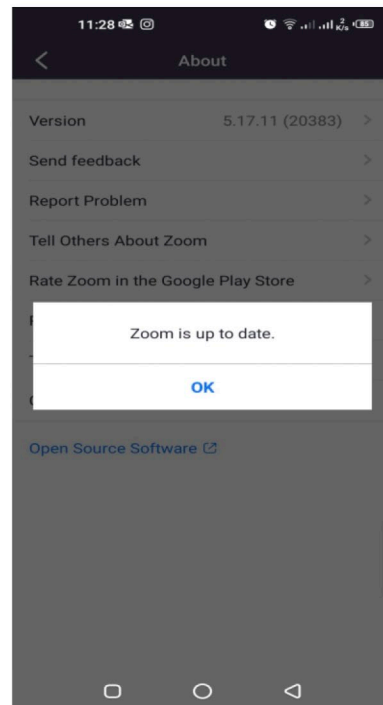

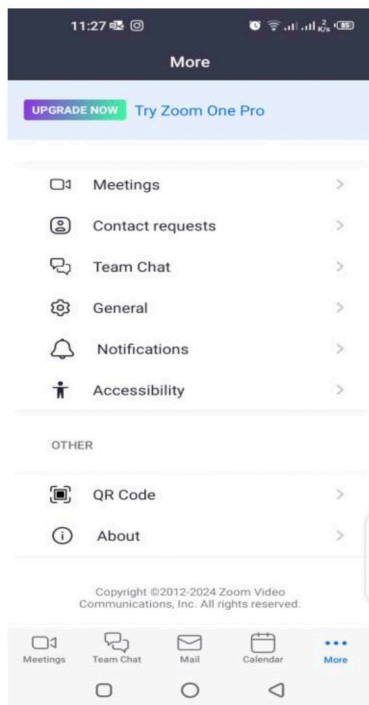

1 Sign in to Zoom desktop client.

2 Go to Zoom menu then click **Check for Updates**. If there is a newer version, Zoom will download and install it. If you already have the latest version install you will get a message that you are on the latest version.

Upgrading the Zoom mobile app for Android and iOS:

- 1 Open and sign in to the Zoom mobile app.
- 2 In the **More** menu, tap **About**. Click on Version, Zoom will check and install the available updates.
